Basic vehicle inspection

A quick visual and operational review of the accessible areas listed below.

Customer

Inspection date / report ID

Year / make / model

VIN / odometer and units

Location / weather / engine cold or warm

Inspector / contact

OK = no significant issue observed | ATT = attention recommended | SIG = significant concern
NI = not checked / not accessible / not applicable. Blank = no recorded result.

AREA / CHECK	RESULT	NOTE / PHOTO ID
Warning lights / basic OBD-II code scan	-	
Oil / coolant / accessible fluid levels	-	
Visible leaks / belts / hoses	-	
Engine start / idle / unusual noises	-	
Visible tires / brakes	-	
Accessible steering / suspension condition	-	
Visible rust / underside condition	-	
Body / glass / lights / cabin controls	-	
Battery connections / charging observation	-	
Road test: shifting / braking / steering	-	

Road test and underside access depend on permission and conditions. Specific concerns and any untested areas are explained on the next page. This Basic review is limited in scope.

Findings & next steps

Your main observations, recommended follow-up, and inspection limitations.

Vehicle / report ID

Significant concerns / recommended next steps

Maintenance / other observations

Not checked / access limits / reason (including NI items)

Diagnostic codes / scan attachment

Photos / attachments

Completed by / date

Reviewed with customer / date / method

Results describe accessible areas at the time of inspection. This report is not a warranty or safety certification. Hidden or intermittent faults may remain; further diagnosis may be recommended.
