80-point Comprehensive PPI

Vehicle details and a plain-language summary of your inspection results.

Customer

Inspection date / report ID

Year / make / model

VIN / odometer and units

Location / weather / engine cold or warm

Inspector / contact

Significant concerns / recommended next steps

Maintenance / other observations

Not inspected / access limitations / reasons (NI item numbers)

Photo / scan attachments and finding references

Completed by / date

Reviewed with customer / date / method

This 80-point checklist records the agreed inspection. Unavailable or inapplicable checks are NI.
Results apply only at inspection time; this is not a warranty or safety certification.

Body, lights & cabin

80-point Comprehensive PPI | Checks 01-20

Vehicle / report ID

OK = no significant issue observed | ATT = attention recommended | SIG = significant concern
NI = not checked / not accessible / not applicable. Blank = no recorded result.

AREA / CHECK	RESULT	NOTE / PHOTO ID
01 Hood / latch / visible panel fit	-	
02 Front bumper / grille condition	-	
03 Front fenders / visible repair indicators	-	
04 Doors / hinges / latches / panel gaps	-	
05 Rear quarters / trunk or hatch operation	-	
06 Roof / pillars / visible damage	-	
07 Windshield / side and rear glass	-	
08 Mirrors / adjustment	-	
09 Low-beam and high-beam headlights	-	
10 Tail lamps / brake lamps	-	
11 Turn signals / hazard lamps	-	
12 Wipers / washers	-	
13 Horn	-	
14 Seat belts / visible restraint condition	-	
15 Seats / adjustments	-	
16 Windows / door locks	-	
17 Dashboard warning lights / messages	-	
18 Heater / blower operation	-	
19 Air-conditioning operation	-	
20 Cabin / trunk moisture or unusual odor	-	

OK describes the observed result, not a guarantee. ATT / SIG findings and NI limitations are explained in the summary or referenced attachments. Road testing depends on permission and conditions.

Engine, electrical & diagnostics

80-point Comprehensive PPI | Checks 21-40

Vehicle / report ID

OK = no significant issue observed | ATT = attention recommended | SIG = significant concern
NI = not checked / not accessible / not applicable. Blank = no recorded result.

AREA / CHECK	RESULT	NOTE / PHOTO ID
21 Cranking / start behavior	-	
22 Idle quality / unusual engine noises	-	
23 Oil level / visible condition	-	
24 Visible engine oil leaks	-	
25 Coolant reservoir level / visible condition	-	
26 Accessible radiator / cooling components	-	
27 Visible cooling hoses / connections	-	
28 Visible drive belts	-	
29 Intake ducting / loose connections	-	
30 Visible engine mounts	-	
31 Visible wiring / connectors	-	
32 Exhaust smoke / unusual odors	-	
33 Battery case / hold-down / terminals	-	
34 Battery / charging voltage observation	-	
35 Engine module scan / communication	-	
36 Available additional module scans	-	
37 Stored diagnostic codes	-	
38 Pending / available permanent codes	-	
39 Readiness monitor status	-	
40 Available live-data abnormalities	-	

OK describes the observed result, not a guarantee. ATT / SIG findings and NI limitations are explained in the summary or referenced attachments. Road testing depends on permission and conditions.

Tires, brakes & suspension

80-point Comprehensive PPI | Checks 41-60

Vehicle / report ID

OK = no significant issue observed | ATT = attention recommended | SIG = significant concern
NI = not checked / not accessible / not applicable. Blank = no recorded result.

AREA / CHECK	RESULT	NOTE / PHOTO ID
41 Left-front tire condition / tread	-	
42 Right-front tire condition / tread	-	
43 Left-rear tire condition / tread	-	
44 Right-rear tire condition / tread	-	
45 Visible tire age / cracking / mismatches	-	
46 Abnormal tire wear	-	
47 Wheels / visible rim damage	-	
48 Spare tire or inflation kit availability	-	
49 Left-front visible pads / rotor	-	
50 Right-front visible pads / rotor	-	
51 Left-rear visible pads / rotor	-	
52 Right-rear visible pads / rotor	-	
53 Accessible brake hoses / lines	-	
54 Brake fluid reservoir / visible condition	-	
55 Accessible steering joints / boots	-	
56 Accessible front arms / bushings / joints	-	
57 Accessible rear arms / bushings / joints	-	
58 Visible shocks / struts / springs	-	
59 Visible sway-bar links / bushings	-	
60 Wheel-bearing noise / accessible play	-	

OK describes the observed result, not a guarantee. ATT / SIG findings and NI limitations are explained in the summary or referenced attachments. Road testing depends on permission and conditions.

Underbody, drivetrain & road test

80-point Comprehensive PPI | Checks 61-80

Vehicle / report ID

OK = no significant issue observed | ATT = attention recommended | SIG = significant concern
NI = not checked / not accessible / not applicable. Blank = no recorded result.

AREA / CHECK	RESULT	NOTE / PHOTO ID
61 Rockers / pinch welds / corrosion	-	
62 Accessible front subframe / mounts	-	
63 Accessible rear subframe / mounts	-	
64 Visible frame / unibody attachment areas	-	
65 Visible fuel lines / leakage concerns	-	
66 Accessible exhaust / hangers	-	
67 Visible transmission leaks	-	
68 Visible differential / transfer-case leaks	-	
69 Accessible CV boots / axle condition	-	
70 Accessible driveshaft / joints	-	
71 Transmission engagement / clutch take-up	-	
72 Normal gear changes	-	
73 Slipping / shudder / hesitation concerns	-	
74 Acceleration / engine response	-	
75 Steering response / pulling	-	
76 Braking response / pedal feel	-	
77 Brake noise / vibration	-	
78 Suspension / drivetrain noise during drive	-	
79 Vibration at tested speeds	-	
80 Post-drive temperature / warnings / leaks	-	

OK describes the observed result, not a guarantee. ATT / SIG findings and NI limitations are explained in the summary or referenced attachments. Road testing depends on permission and conditions.

Measurements & test details

Readings and test conditions supporting the checklist results.

Vehicle / report ID

Tires and accessible brake pads

LF = left front | RF = right front | LR = left rear | RR = right rear

LF tread (32nds in.)	**Visible pad material (mm)**	**Limit / note**
RF tread (32nds in.)	**Visible pad material (mm)**	**Limit / note**
LR tread (32nds in.)	**Visible pad material (mm)**	**Limit / note**
RR tread (32nds in.)	**Visible pad material (mm)**	**Limit / note**

Scan tool / modules / codes / readiness / scan attachment

Battery / charging: reading, units, engine state

Road test: permission / route / time / speed / mileage / limits

Measurements apply only to accessible areas. Specifications depend on the vehicle. A code does not confirm a failed part; no codes does not rule out a fault. Hidden or intermittent issues may remain.
